

BE SEEN

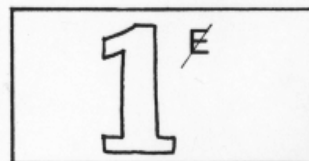

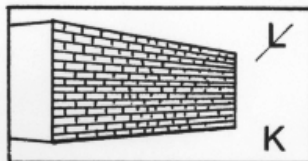

At night drivers do not easily see pedestrians walking along the road. Pedestrians must make themselves visible. What can pedestrians do to help drivers see them?

PICTURE PUZZLES

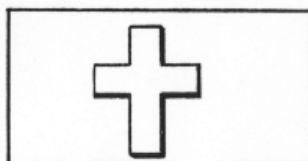

Name the picture in each block. The first and last letters of the names have sometimes been changed. These changes are shown by adding or subtracting letters at the beginning of the name or at the end. New words will form. An example is the first block $w + \text{ear} = \text{wear}$. See if you can do all of them. These pictures will make sentences giving hints on how to be safe when walking at night.

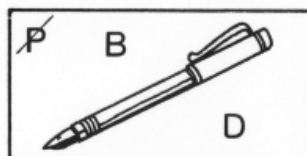

1. _____

2. _____

3. _____
