9 CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or
concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

UPDATE OF KWAZULU-NATAL FREIGHT DATABANK**1. BACKGROUND**

Freight transport corridors of a country are the arteries of the economy and transportation networks have major implications for industrial efficiency, costs and sustainability of economic development, export competitiveness, employment and growth.

To put the KwaZulu Natal Department of Transport in a position to develop and integrated freight plans, it first had to develop a freight databank to better understand the existing freight movements within the province and together with the potential freight requirements through the province. This databank was completed in 2003. This databank was used as a pilot project by National Department of Transport and in the years that followed, the nine other provinces in the country carried out the same initiative based on the KwaZulu-Natal Databank. All provincial databanks will be consolidated into one National Freight Logistics Information System.

1.1. OBJECTIVES

The KZN Freight Databank was developed in 2003 and every five years Freight Databank needs to be updated. Therefore, the KwaZulu Natal Department of Transport requires the services of a suitably qualified consultant to perform an update of the provincial databank.

2. Project Scoping**2.1. Data Collection**

The service provider will be required to collect statistics on origins and destination of freight traffic, volumes of cargo, vehicles types, number of vehicles, accident data and important trends in the movement of freight on provincial and national transportation routes between important nodal points such as the ports, airports, industrial locations, etc. The focus of the databank update extends to include all modes of transport that is:

- Road Transport
- Rail Transport
- Air Transport
- Maritime
- Pipeline Transport
- Intermodal Facilities

2.2. Data Capturing

All data that has been collected will be required to be captured on a data information system that should be adaptable to the Department's System, therefore the service provider should consult with the Department's IT Section in order ascertain the system that would be compatible to the Department's system.

2.3. Data Analysis

The service provider will be required to do a desk top analysis of data and compare the freight movement by all modes. The data analysis exercise should also compare the amount of cargo movement in the past five year period by each mode of transport with the current trend of cargo movement.

2.4. Freight Databank Website Update

The service provider will need to develop the website which will be hosted by KZN-DoT website and the ownership will be belong to the Department.

3. Mandatory Requirements

3.1. Skills Transfer

Service providers need to outline how they would incorporate and transfer skills to at least two of Department's employees.

4. AGREEMENT

Prior to being appointed the successful Bidder will be required to sign a formal Service Level Agreement with the Department and will be bound by the terms and conditions contained therein. No appointment will be deemed to be finalized without the Service Level Agreement being signed by the contracting parties.
