**Page 61. Under the first paragraph of 4.8. This paragraph must be read as follows:**

The operator must provide twenty-five (25) vehicles, including spares, of converted universally accessible (22-seater-capacity vehicles). The buses will be distributed according to the number of districts we have in the province. Therefore, since there are eleven districts, this suggests that two buses per district and the remaining 3 will serve as spare buses.

In order to accommodate all forms of disability, one bus will be a normal bus and the other one will be modified to accommodate all forms of wheelchairs used for disability. In summary, eleven buses will be normal and another eleven will be modified. In the spare buses, one will be modified and two be normal.
