SPECIFICATION

PROVISION OF ENVIRONMENTAL AUTHORISATION SERVICES

FOR THE REPLACEMENT OF THE EXISTING ARMCO PIPE WITH CONCRETE CULVERTS ON P340 KM 12+30, KM 13+67, KM 16+04, KM 17.42 AND KM 32+92, BERGVILLE AREA.

The KwaZulu-Natal Department of Transport (KZN DOT) hereby invites Environmental Assessment Practitioners (EAPs), with the relevant skills and qualifications, registered with the Environmental Assessment Practitioners Association of South Africa (EAPASA) and with a minimum of 5 years' experience, to submit proposals to KZN DOT for providing environmental authorisation services required for the proposed replacement of Armco pipes with concrete culverts on Main Road P340 as mentioned above.

The environmental components for this project have been divided into three phases:

- Phase 1: Project screening to confirm the relevant listed activities in accordance with the Environmental Impact Assessment Regulations, 2014 as amended (EIA Regulations) with the competent authority related to the application for environmental authorisation.
- Phase 2: Appointment of service provider to execute the recommended works for environmental authorisation.
- Phase 3: Ad-hoc work that may be required by KZN DOT.

EAPs are required to submit their proposals to KZN DOT. The submission should include both technical and financial proposals submitted in a single submission. Should the proposals be acceptable to KZN DOT, EAPs will be requested to enter into an agreement to execute the services required.

1. Project Background

The KZN DOT is in the planning phase for replacing five (5) Armco pipes on Main Road P340. Main Road P340 (R74) extends from the intersection with Main Road 30 (P30) in Bergville Town and traverses in a north-westerly direction towards Oliviershoek Pass, Little Switzerland, leading to Sterkfontein Dam and ending at the Free State Border. The road is situated in the Okhahlamba Local Municipality (KZN 238). The area through which the road passes is situated in a wet climatic region with a very rugged steep terrain and traverses numerous valleys. This region often experiences abnormal rainfall up in the mountains, which implies high probability of earth saturation leading to scouring, erosions and incidentally slippage failures to occur.

2. Scope of Work

2.1. Scope

The EAPs are to advise on the authorisations required and detailed scope of works for the environmental assessment for the planned replacement of Armco pipes with concrete culverts on Main Road P340. The project evaluation should provide guidance on the environmental obligations in terms of the National Environmental Management Act (No. 107 of 1998), and the EIA Regulations. The project evaluation should also include a fee structure illustrating the costing for managing and running the entire environmental impact assessment and preparing of an Environmental Management Programme (EMPr) and managing of any specialists' studies.

2.1.1. Borrow Pits and Quarries

It is anticipated that a portion of the material required for road fill will be sourced from commercial quarries.

2.1.2. Land Acquisition

Realignment of the existing road is not anticipated, but land may be required for the deviation to accommodate traffic in sections where half width construction will not be feasible.

2.2. Project Description

The KZN DOT plans to replace five (5) Armco pipes located on Main Road P340 with concrete culverts. These Armco pipes have corroded and resulted in road settlements. The Armco pipes that are planned to be replaced with concrete pipe culverts are located in the following chainages: 12+30, KM 13+67, KM 16+04, KM 17.42 AND KM 32+92. The table below indicates the concrete culverts that will be constructed to replace existing Armco pipes.

Chainages	Proposed Culvert Size	Coordinates
12+296	3 x 1,2m Dia. Pipe	28.65699 S, 29.25558 E
13+685	3 x1.5m Dia pipe	28.64880 S, 29.24126 E
16+040	2 x 1.35m Dia. Pipe	28.64373 S, 29.21538 E
17+424	2 x 1,2m Dia. Pipe	28.64329 S, 29.20458 E
32+920	0.9m Dia. Pipe	28.608442 S, 29.061567 E

The existing road cross section is an 8-meter surfaced carriage way, consisting of 3.5-meter-wide single lanes in either direction with 0.5-meter shoulders. The KZN DOT road reserve for this project is 15 meters wide either side of the road centerline. For traffic accommodation, deviation will be constructed in sections where half width construction will not be feasible.

2.3. Objectives of Investigation

To obtain Environmental Authorisation from the competent authorities for the planned upgrade in terms of the EIA and WULA legislation and Regulations. In addition to this, the EAP shall be conversant with all other environmental legislation pertaining to the project including the National Environmental Management Biodiversity Act (No. 10 of 2004), the National Forests Act (No. 84 of 1998) and National Roads Act, 1998 (Act No. 7 of 1998). The project must comply with environmental requirements which may fall within the jurisdiction of other government agencies such as the AMAFA pertaining to Heritage Permits, Ezemvelo KZN Wildlife and Department of Agriculture, Forestry and Fisheries (DAFF) pertaining to permits for the removal of protected trees etc.

2.4. Approach / Proposed Methodology

The EAP shall be responsible to/for, inter alia, the following:-

- Familiarise him/herself with the geographical environment in which the rehabilitation is planned.
- Undertaking all necessary site visits/inspections with the relevant authorities/stakeholders.
- Identifying all processes, information, plans and reports required to comply with applicable environmental legislation required for **Phase 1**.
- All processes, information, plans and reports produced in complying with applicable environmental legislation for **Phases 2 and 3**.
- The delivery of high-quality assessment documents and associated application forms to the relevant government departments in order for them to make a decision on the authorisation and licenses required for

the proposed road upgrade.

- Identifying and manage all required activities in respect of the environmental impact assessment processes, in **Phases 2 and 3**, including but not limited to: identification of environmental risks, propose measures to minimise adverse environmental impacts, reduce conflict by promoting community participation, inform decision-makers and help to lay the foundation for financially viable, technically feasible, socially acceptable and environmentally sound projects.
- Meetings with client and the environmental authorities and other relevant correspondence for **Phases 1, 2 and 3**.
- The Public Participation Process applicable to legislation.

The successful EAP will be required to elaborate on the specific methodology that they intend to follow. Relevant design layouts and drawings or any relevant electronic information shall be made available to the successful EAP.

2.4.1. Technical Proposal Documentation

- The proponents' relevant experience and track record in the required disciplines, including x3 reference letters for completed road infrastructure projects.
- A concise methodology of how the EAP intends to carry out the assignment to produce the necessary outputs and documentation. The proposal shall be specific as to the tasks that are to be carried out, the allocation of resources to tasks over time, the proposed programme and the reporting and results that are to be supplied to KZN DOT. All the necessary specialist studies required must also be included in the methodology.
- The proponents proposed project team and each individual member's relevant experience and track record in this field. The proposal must include a full resource list, Curriculum Vitae (CV) of key personnel that are to be used on the project including the team leader. In the case of a joint venture a signed resolution authorising the team leader to sign on behalf of the joint venture.
- Preliminary details of reports to be reviewed, other surveys and investigations that are to be undertaken and procured.
